John Dewey Martic High School	Tamil Nadu, India
SSLC; 63.8 %	June 2018 – March 2019

SKILL SUMMARY

- Languages:** SQL, Python.
- Frameworks & Libraries:** Django, Pandas, NumPy, Matplotlib, Seaborn
- Databases:** PostgreSQL
- Tools:** Visual Studio Code, Excel, Power BI, Jupyter Notebook.
- Version Control:** Git, GitHub.
- Other Skills:** Data Analysis, Dashboarding & Reporting
- Soft Skills:** Communication skills, Teamwork, Problem-Solving, Eagerness to learn.

INTERNSHIP CERTIFICATE

Completed a MERN Stack Developer Internship at BM TECHx, Pondicherry, gaining hands-on experience with MongoDB, Express.js, React.js, and Node.js

Successfully completed a Data Analytics Internship at Gradtwin, Sholinganallur, Chennai, acquiring practical experience in data analysis, dashboard development, reporting, Excel, Python, and Jupyter Notebook

STARTUP & INNOVATION EXPERIENCE

Presented the "I Attend" face recognition attendance system at StartupTN DPIIT Connect meet, explaining the project to potential investors.

PROJECTS SUMMARY

Direct2Farmer (D2F):

Platform connecting farmers and customers directly, ensuring transparent pricing and eliminating intermediaries.

Lofa Beauty Hub:

Web app for startups to showcase and sell beauty products, supporting brand growth with a user-friendly interface.

Fresh Mart:

Online ordering platform providing efficient product browsing, order tracking, and enhanced customer experience.

Bus Management System:

System to manage bus entries/exits and staff attendance, improving organizational efficiency.

Build Mart:

Responsive web platform for construction product listings with product comparison and secure checkout.

IAttend:

Mobile attendance tracking system with location-based check-ins for students and educators.

Spy Camera Detector:

Security tool to detect hidden cameras via reflection and network scan using web technologies.

Dine Desk:

Dine Desk is a restaurant management and food ordering platform designed to enhance the dining experience by enabling digital table reservations, order tracking, and menu browsing

Uzhavan Kart:

Developed *UzhavanKart*, a farmer-to-customer e-commerce platform enabling direct farm produce sales with hub-based storage and managed delivery system.

Expiryfy:

Built a Django-based system to track product shelf life in retail stores and send email alerts three days before expiry, with dashboard reports for better inventory management.

CDF – Crop Disease Detection System:

Developed a deep learning model using TensorFlow/Keras to detect plant leaf diseases, integrated into a Django web app for real-time farmer-friendly predictions.

Udemy Courses Performance Dashboard:

The project demonstrates practical skills in data cleaning, exploratory data analysis (EDA), visualization, and business insight generation using Python and Power BI-style thinking.
