Professional Summary

MCA graduate with strong foundation in Python, SQL, Data Analytics, Power BI, and Django development. Experienced in building data dashboards, performing exploratory data analysis, and developing full-stack web applications. Seeking an entry-level Data Analyst or Software Developer role to apply technical and analytical skills.

Internship Experience

Data Analytics Intern, Gradtwin	Chennai
• Cleaned and transformed datasets using Python and Excel. • Built dashboards and reports using Power BI. • Performed exploratory data analysis (EDA). • Generated actionable business insights.	

Education

Master of Computer Applications (MCA), Sathyabama Institute of Science and Technology CGPA: 7.67	2024 – 2026
Bachelor of Computer Applications (BCA), St. Joseph's College of Arts and Science CGPA: 7.11	2021 – 2024
HSC, John Dewey Matric Hr. Sec. School 74.33%	2021
SSLC, John Dewey Matric High School 63.8%	2019

Technical Skills

Language Python, PHP, Html, SQL	Frameworks & Libraries Django, Pandas, NumPy, Matplotlib, Seaborn
Database PostgreSQL	Tools Power BI, Excel, Jupyter Notebook, VS Code
Version Control GitHub

Projects

Uzhavan Kart, *Django, Python, PostgreSQL*

- Developed a farmer-to-customer e-commerce platform enabling direct sale of agricultural products without intermediaries.
- Designed and implemented modules for farmer registration, customer management, product listing, and order processing.
- Built a PostgreSQL database to manage users, products, inventory, and transaction records efficiently.
- Integrated authentication and role-based access control for farmers, customers, and administrators.
- Developed hub-based storage and delivery management features to streamline product distribution.
- **Live Demo:** <https://uzhavankart.onrender.com/customer/home/>

IAttend, *Python, Django*

- Developed a smart attendance management system using face recognition technology for automated attendance tracking.
- Implemented location-based attendance verification to ensure attendance is marked only from authorized locations.
- Integrated webcam-based face detection and recognition for accurate student identification.
- Designed an admin dashboard to manage students, attendance records, and reports.
- Reduced manual attendance tracking efforts through automation and real-time monitoring.

Udemy Course Performance, *Python | Pandas | NumPy | Matplotlib | Power BI*

- Collected and analyzed Udemy course datasets to identify trends in pricing, ratings, and enrollments.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) using Python libraries.
- Created interactive dashboards and visualizations to present business insights effectively.
- Identified high-performing course categories based on revenue, reviews, and learner engagement.
- Generated data-driven recommendations to improve course performance and customer reach.

Certifications

- Hacker Rank SQL
(Intermediate)

Achievements

STARTUPTN DPIIT CONNECT PRESENTATION

- Presented the IAttend Smart Attendance System at StartupTN DPIIT Connect Meet.
- Demonstrated project features and technical implementation to industry professionals and potential investors.
- Received positive feedback on the practical application of face recognition technology in educational institutions.
